Parking & accessing the Prevention Center

Driving directions

Park in the **PHS Study Participant Parking Garage (Level D)** located in the Arnold building (a right turn off Campus Drive/Ward Street). You will see a sign that reads *Visitor Parking*. There is no need to take a parking validation ticket.

From the parking garage, go to the double doors and buzz the intercom button. State that you are a study participant here for a visit to the Prevention Center and security will admit you to the building. On entry, take the elevator down to **Level E**.

From the Level E lobby, turn toward the hallway and follow it past the restrooms and water fountain into the atrium with the sofas, tables, and chairs. In the atrium you'll find the lit wall sign and the entrance to the Prevention Center.

To return to the parking garage after your appointment, walk along the wall on your right to the elevator lobby, and take an elevator up to Level D. Proceed through the doors marked Study Participants Parking Level D.

Public transportation

You will see a reception desk and visitor center as you enter the Arnold building from Campus Drive/Ward Street. Continue down the hall towards the glass doors.

After passing through the glass doors into the 1st floor atrium, turn left through another set of glass doors into the elevator lobby and go to **Level E**.

From the Level E elevator lobby, turn toward the hallway and follow it past the restrooms and water fountain into the Level E atrium with the sofas, tables, and chairs. In the atrium you'll find the lit wall sign and double-door entrance to the Prevention Center.
